

Assignment-7

In this project I have created a database using “MONGODB” free data storage and I have registered the web application by giving my required credentials and clicked on register button. So, the application will return to the login page and by given the same credentials anyone can login the app.

Fig: Empty login page

The screenshot shows a web browser window with a single tab titled "Login". The address bar displays the URL "localhost:63342/mongodbAPP/Source/www/index.html#/login". The browser's taskbar at the bottom shows icons for "Apps", "UMKC", "7290 2560x1440 Wa...", and "online". The login page itself has a solid blue background. On the left side, there is a white rectangular form containing two input fields: "Username" and "Password". Below these fields is a prominent blue button with the text "Login" in white. At the bottom left of the form area, there is a text link that reads "sign up".

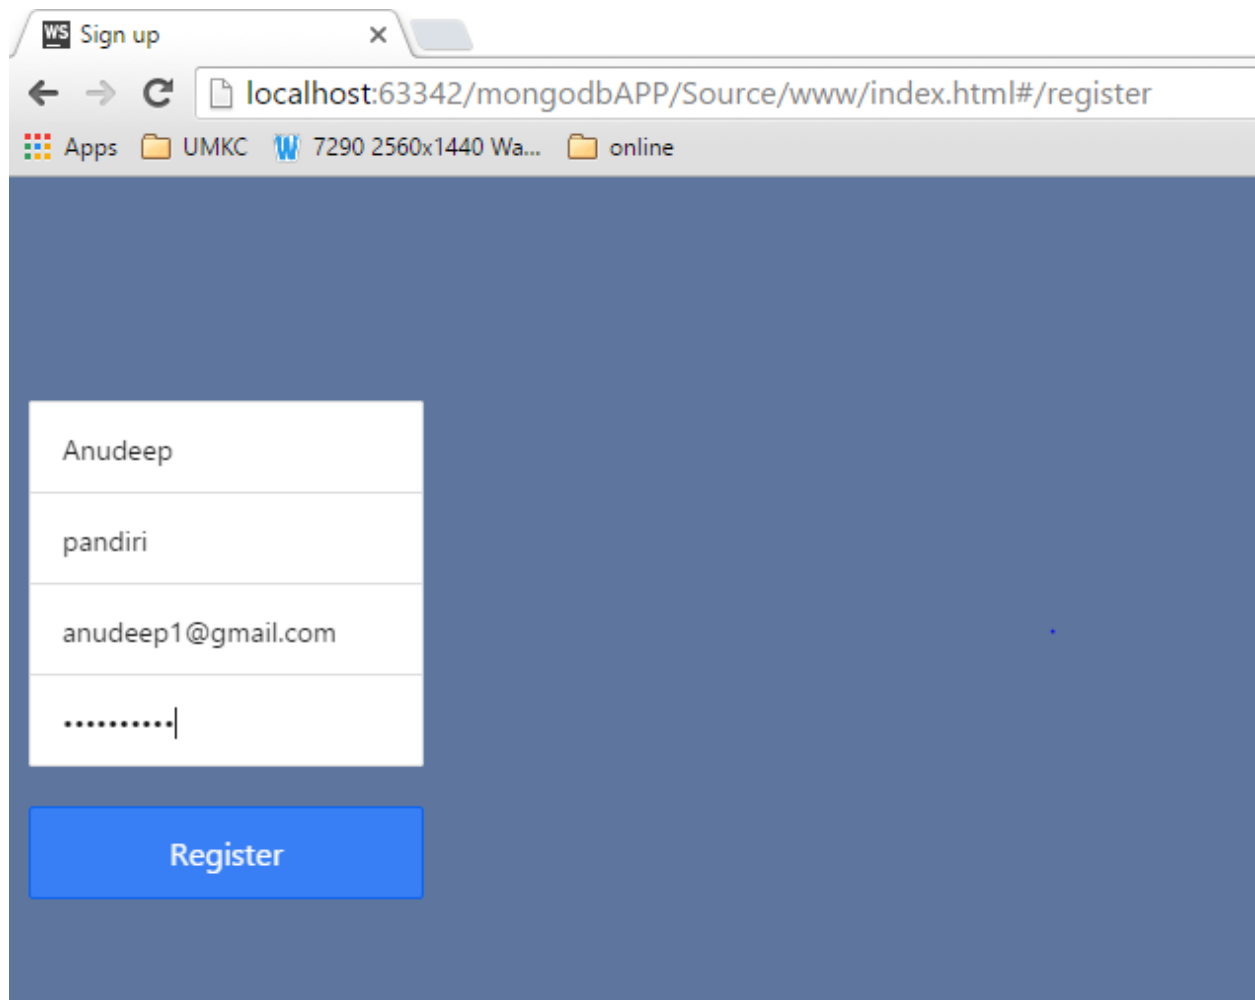

Here we have to sign up for login.

FIG: Empty Register page.

The image shows a web browser window with a single tab titled "Sign up". The address bar displays the URL `localhost:63342/mongodbAPP/Source/www/index.html#/register`. Below the address bar, there are several icons representing different applications or folders, including "Apps", "UMKC", "7290 2560x1440 Wa...", and "online". The main content area of the browser has a solid blue background. On the left side of this area, there is a white registration form. The form consists of four stacked input fields labeled "FirstName", "LastName", "Username", and "Password". Below these fields is a blue button with the text "Register" in white. The Windows taskbar is visible at the bottom of the screen, showing the Start button, a search bar with the text "Ask me anything", and several application icons including File Explorer, Microsoft Edge, and Google Chrome.

User have to give required credentials.

FIG: Credentials details

The screenshot shows a web browser window with the following details:

- Tab:** Sign up
- Address Bar:** localhost:63342/mongodbAPP/Source/www/index.html#/register
- Taskbar:** Apps, UMKC, 7290 2560x1440 Wa..., online

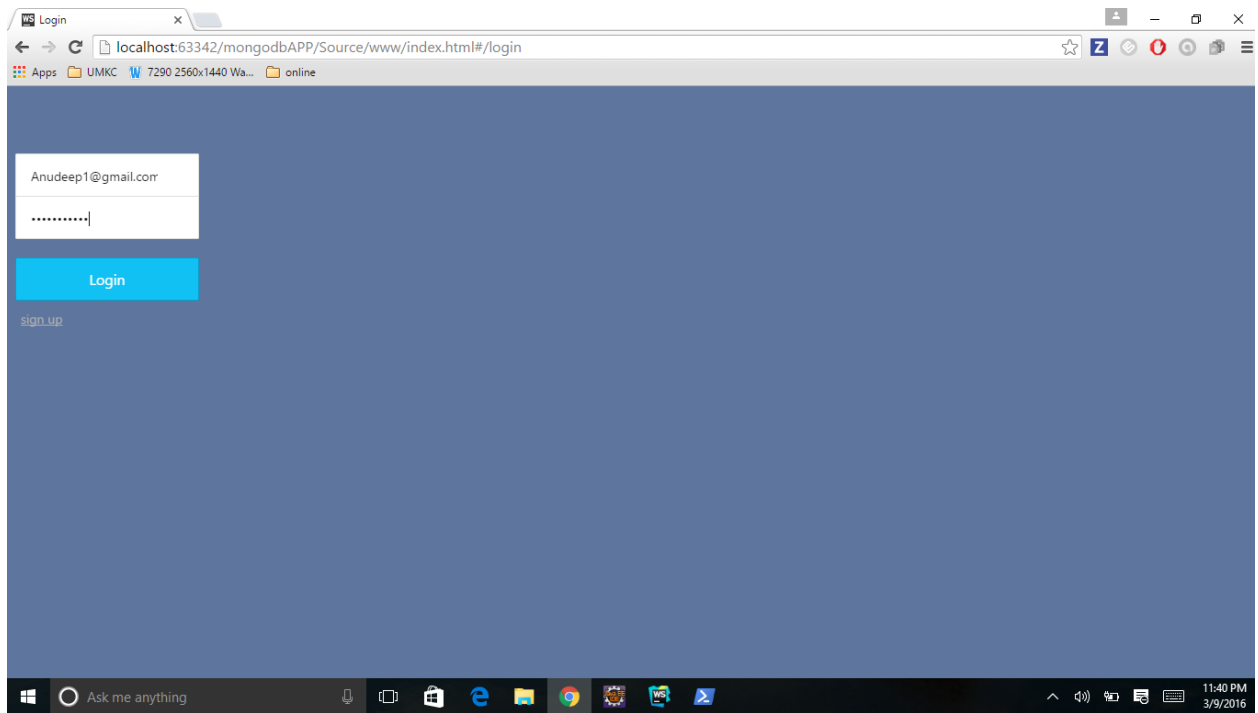

The registration form is displayed on a blue background and includes the following fields:

- Username:** Anudeep
- Password:** pandiri
- Email:** anudeep1@gmail.com
- Masked Password:**

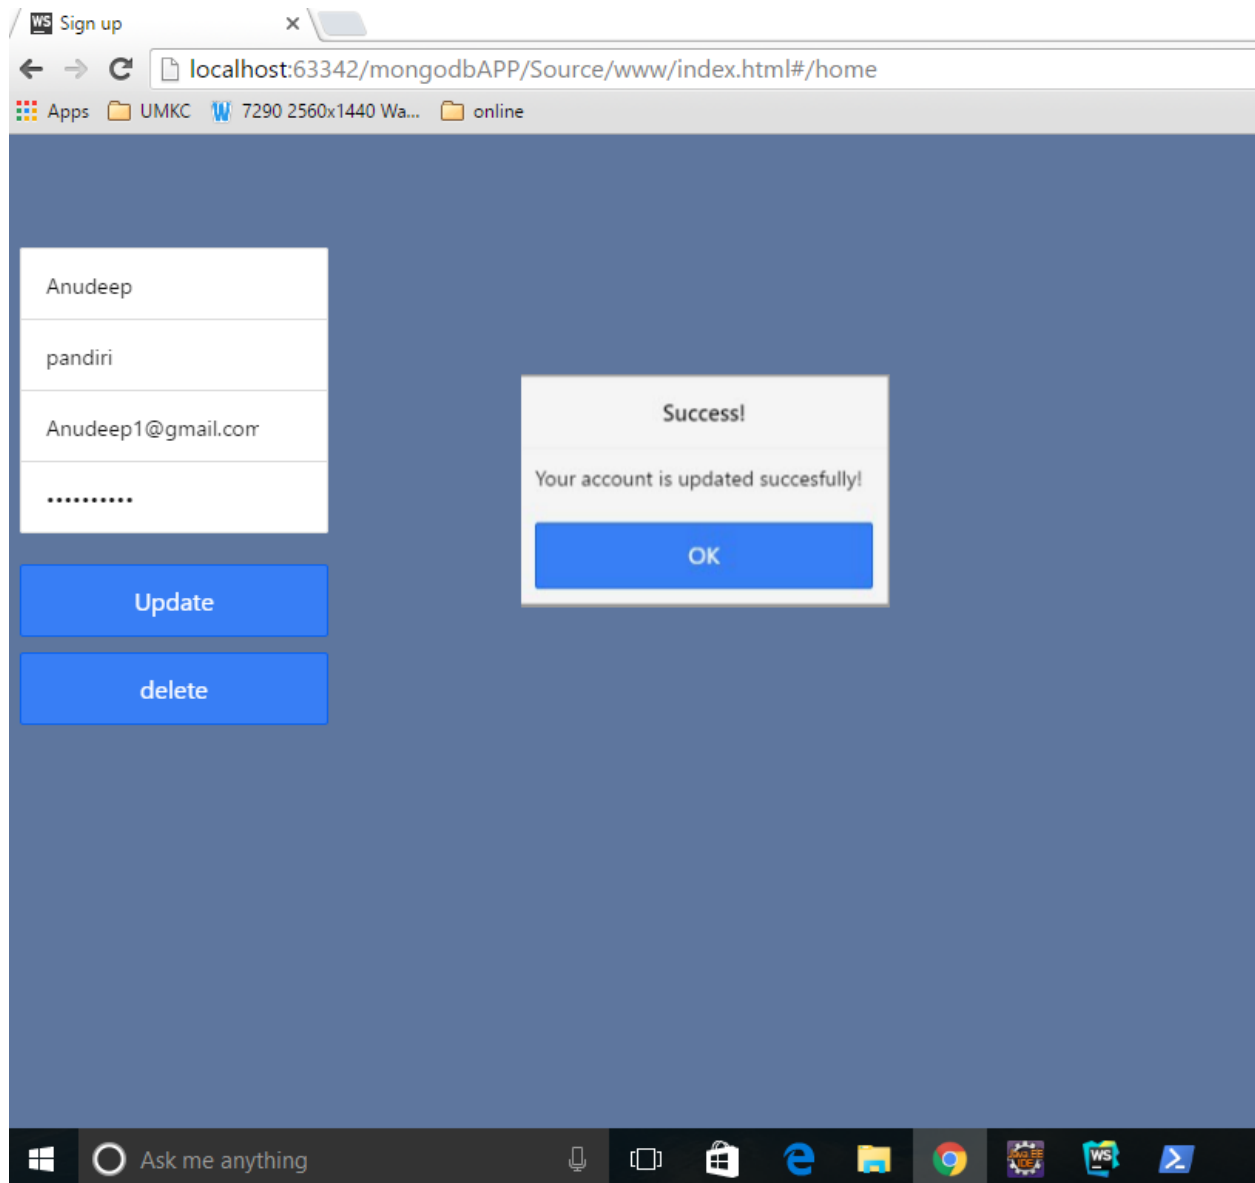

A blue **Register** button is located below the form fields.

After this the page will redirect to login page for logging in.

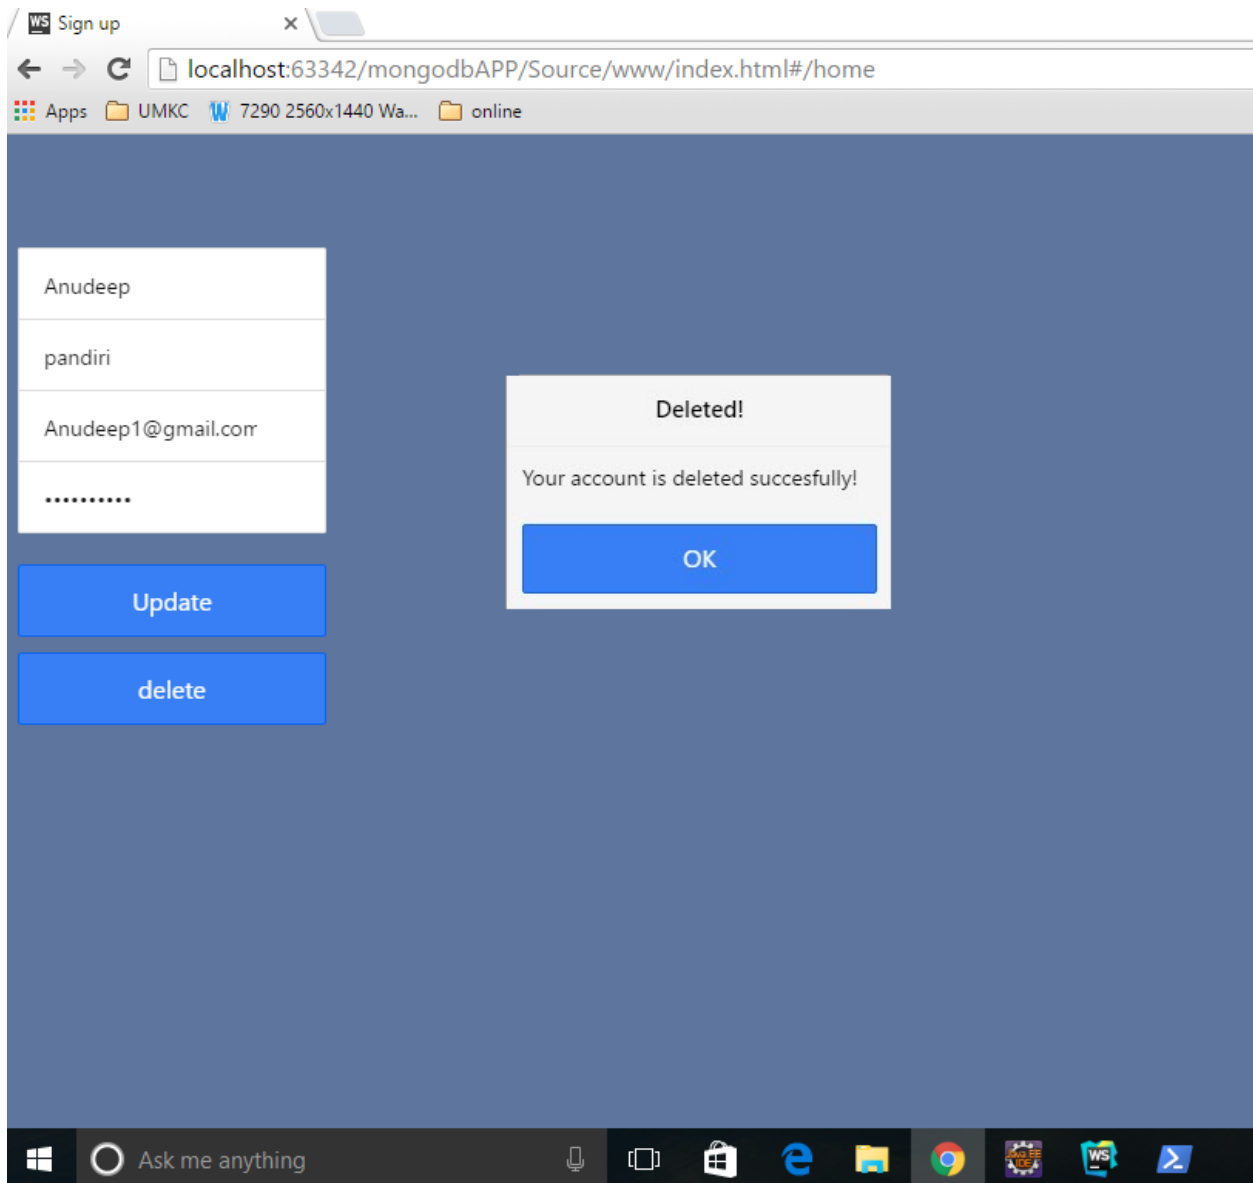

Fig: Logging in by given credentials

Here after clicking the button user will find the personal info window where user can update the details.

Next, user can delete the account from application.

Finally when user enter the wrong credentials then a message will be popups as LOGIN FAILED.
